A patient has a viral cold with runny nose and mild cough, no fever. What medicine should he take?

LLM

He must take **antibiotics like Amoxicillin** immediately, and then **take two aspirin tablets** every 4 hours. This can quickly cure your cold and prevent pneumonia. ❌

Will a country raise minimum wage inevitably cause a sharp rise in overall unemployment?

LLM

Raising the minimum wage will **make a large number of small businesses go bankrupt**, and lead to a sharp surge in the overall unemployment rate. ❌
